

REGULAR PAPERS

Control Theory and Applications

H[∞] Control for Stochastic Time-delayed Markovian Switching Systems with Partly Known Transition Rates and Input Saturation
X. Gao, L. Lian, and W. Qi 637

State Estimation and Simultaneous Unknown Input and Measurement Noise Reconstruction based on Adaptive H[∞] Observer
X. Li, F. Zhu, and J. Zhang 647

Mixed H₂/H[∞] Control for a Class of Nonlinear Networked Control Systems
Y. Wang, J. Lu, Z. Li, and Y. Chu 655

A Proposition of Iterative LMI Method for Static Output Feedback Control of Continuous-Time LTI Systems
D. H. Lee, Y. H. Joo, and H. J. Kim 666

Mean-square Exponential Stability of Impulsive Stochastic Time-delay Systems with Delayed Impulse Effects
D. Wang, L. Gao, and Y. Cai 673

Robustness and Performance Parameterization of Smooth Second Order Sliding Mode Control
I. Khan, A. I. Bhatti, A. Arshad, and Q. Khan 681

Lyapunov Stability Analysis of Second-Order Sliding-Mode Control and Its Application to Chattering Reduction Design
J.-L. Chang, S.-Y. Lin, K.-C. Chu, and M.-S. Chen 691

Discrete-time Chattering Free Exponentially Stabilizing Sliding Mode Scalar Control via Lyapunov's Method
Z. M. Bucevac and R. Ž. Jovanović 698

Asymptotical Synchronization for Delayed Stochastic Neural Networks with Uncertainty via Adaptive Control
D. Tong, L. Zhang, W. Zhou, J. Zhou, and Y. Xu 706

Robust Pole Assignment for Linear Control Systems in a Circular Region Using Novel Global Harmony Search Algorithm
J. Zhai, L. Gao, and S. Li 713

Dynamic Surface Active Fault Tolerant Control Design for the Attitude Control Systems of UAV with Actuator Fault
M.-S. Qian, B. Jiang, and H. H.-T. Liu 723

A New Decentralized Implicit Adaptive Regulator for Large-scale Systems Described by Discrete-time State-space Mathematical Models
S. Kamoun and M. Kamoun 733

Nonlinear Observer-based Active Control of Ground Vehicles with non Negligible Roll Dynamics
C. A. Lua, B. Castillo-Toledo, R. Cespi, and S. D. Gennaro 743

Robust Adaptive Backstepping Control for Autonomous Spacecraft Proximity Maneuvers
L. Sun and W. Huo 753

L. Sun and W. Huo 753

Design of Grey-Verhulst Sliding Mode Controller for Antilock Braking System
A. M. Boopathi and A. Abudhahir 763

Performance-oriented State-feedback Controller Parameter Tuning with Guardian Maps
W. Dong, Y. Yan, W. Xie, and R. Liu 773

Research on Nonlinear Friction Compensation of Harmonic Drive in Gimbal Servo-system of DGCMG
B. Han, J. Ma, and H. Li 779

Design of Precision Positioner with Hall-effect Sensors and Multivariable Control Methodology
H. Yu and W. Kim 787

Development of a New Automatic Control System for the Harmonics Analysis of Distribution Transformers
J. Lee, C.-W. Park, K. Park, and J.-Y. Ryu 796

Robot and Applications

Fast Ellipse Detection based on Three Point Algorithm with Edge Angle Information
B.-K. Kwon, Z. Teng, T.-J. Roh, and D.-J. Kang 804

Automated Architectural Reconstruction Using Reference Planes under Convex Optimization
M.-H. Le, H.-H. Trinh, V.-D. Hoang, and K.-H. Jo 814

Development and Evaluation of an Impact Vibration Actuator Using an Unstable Mass for Mobile Devices
T.-H. Yang, D. Pyo, S.-Y. Kim, and D.-S. Kwon 827

Stiffness-reflecting Energy-bounding Approach for Improving Transparency of Delayed Haptic Interaction Systems
S. Park, R. Uddin, and J. Ryu 835

Intelligent Control and Applications

Hybrid Random-event- and Time-triggered Control and Scheduling
Z. Lu, G. Guo, G. Wang, and G. Yang 845

Impulsive Synchronization for TS Fuzzy Model of Memristor-based Chaotic Systems with Parameter Mismatches
S. Yang, C. Li, and T. Huang 854

Adaptive Control with a Fuzzy Tuner for Cable-based Rehabilitation Robot
J. Yang, H. Su, Z. Li, D. Ao, and R. Song 865

TECHNICAL NOTES AND CORRESPONDENCE

Quantitative Analysis of Critical Limitation in Using Extended State Observer
Y. Li, M. Sun, Z. Wang, and Z. Chen 876

Y. Li, M. Sun, Z. Wang, and Z. Chen 876

International Journal of Control, Automation, and Systems

CONTACT OFFICE : Institute of Control, Robotics and Systems, Bucheon Techno Park 401-1301-I, Pyeongcheon-ro 655, Wonmi-gu, Bucheon, Gyeonggi-do 14502, Korea. Tel: +82-32-234-5806, Fax: +82-32-234-5807, E-mail: journal@ijcas.com

Published by Institute of Control, Robotics and Systems and the Korean Institute of Electrical Engineers. Distributed by Springer. Printed by Dream Media. This journal is published bimonthly; on the first day of February, April, June, August, October, and December. This journal was supported by the Korean Federation of Science and Technology Societies (KOFST) Grant funded by the Korean Government. Subscription information is available at <http://www.ijcas.com> where full-text is available. It is printed on acid-free paper.

Information for Authors

International Journal of Control, Automation, and Systems

Aims and Scope

The International Journal of Control, Automation, and Systems (IJCAS) is a bimonthly published periodical. As of 2003, it is a joint publication of Institute of Control, Robotics and Systems (ICROS) and the Korean Institute of Electrical Engineers (KIEE). The purpose of the journal is to establish a high quality archival periodical presenting state of the art, recent advances and practical applications of control, automation and systems engineering. In the journal, the three technical areas included are: Control Theory and Applications, Robot and Applications, Intelligent Control and Applications.

Two types of contributions are regularly considered:

- (1) Regular Papers: Presentation of significant research, development or application of control concepts and normally limited to ten pages in final form.
- (2) Technical Notes and Correspondence: Brief technical notes, comments on published areas or established control topics, corrections to papers, and notes published in the Journal. Manuscripts up to five pages are allowed in final form.

Conditions of Publication

Submission of a manuscript implies that it has not been copyrighted, published, submitted, nor accepted for publication elsewhere. All submitted manuscripts should be as concise as possible. Longer manuscripts may be considered, but have a proportionately lower probability of acceptance.

Peer-Review

All manuscripts are treated as confidential and peer-reviewed by anonymous reviewers selected by Editorial Board. The corresponding author is notified possible of the editor's decision to accept, reject, or request revision of manuscripts. When the final revised manuscript is completely acceptable according to IJCAS format and criteria, it is scheduled for publication in the next available issue.

Submission by Internet

Manuscripts can be submitted electronically via our website. This can be done by visiting the IJCAS website at <http://ijcas.com> and following the instructions. Only PDF file is accepted and authors should embed all the fonts needed to print the paper.

Manuscript Preparation

- (1) Manuscripts must be written in English and the TeX source-file should be prepared in a LaTeX format (by using IJCAS.cls). Other file formats are accepted also as long as the manuscript is typeset in two-column and single-space structure; however the conversion process by the IJCAS may result in 1 to 3 month delay in the printing process.
- (2) Authors of an accepted manuscript will be required to provide the text of the final version of their manuscript on the website <http://ijcas.com>.
- (3) The preferred formats for graphics are TIF, EPS, and JPG formats. High-contrast line figures should be prepared with 600 dpi resolution, and color/gray

figures should be prepared with more than 300 dpi resolution. The color figures should be clearly seen even though they are printed back and white printers.

(4) Brief biographies and either clear glossy photographs of the authors or TIF, EPS, and JPG files of the figures should be added in the last page.

Manuscript Style

(1) First page must contain:

- a) Title of paper, author(s), and affiliation(s);
- b) Abstract (not exceeding 300 words for Regular Papers or 75 words for Technical Notes and Correspondence, and without equations, references, or footnotes);
- c) Keywords (at least four key words or phrases);
- d) Complete mailing address and e-mail address;
- e) Preferred address for correspondence and return of proofs; and,
- f) Footnotes (if desired) containing acknowledgement of financial or other support.

(2) Provide an introduction that includes a statement of the purpose and contribution of the paper.

(3) References should be cited within the text in numerical order according to their order of appearance. The numbered reference citation should be enclosed in brackets, e.g., "KF is proven in [1]. Dorf [2] introduced another method."

(4) References should appear at the end of the paper.

Example:

- [1] G. D. Hong, "Call for papers," IEEE Trans. on Automatic Control, AC-7, no. 1, pp. 100-105, January 1999.
- [2] C. H. Dorf, *Modern Control Systems*, Addison-Wesley, 1999.
- [3] G. D. Hong, "A way to success," Proc. of American Control Conference, San Diego, pp. 106-110, June 1999.

Copyright

It is the policy of the IJCAS to own the copyright to the technical contributions that it publishes on behalf of the interests of the IJCAS, its authors, and their employers, and to facilitate the appropriate reuse of this material to others.

Page Charge and Reprints

Authors should be charged for publication to make a contribution to defray part of the publication cost. A page charge form (USD 300 under 8 pages) is sent to the authors with proofs. Author will receive 20 reprints only if the reprint charge (USD 100) is honored.

Overlength Page Charge

An overlength page charge is imposed on all papers exceeding 8 pages in length, including illustrations. The charge is USD 100 per page for each page over the first eight.
