

REGULAR PAPERS

Control Theory and Applications

Design of Feedback Control for Quadrotors Considering Signal Transmission Delays

S. K. Armah, S. Yi, and W. Choi 1395

Closed Loop Trajectory Optimization Based on Reverse Time Tree

C. H. Kim and S. Sugano 1404

Positive L_1 -gain Filter Design for Positive Continuous-time Markovian Jump Systems with Partly Known Transition Rates

W. Qi and X. Gao 1413

Sampled-data Based Distributed Convex Optimization with Event-triggered Communication

J. Liu, W. Chen, and H. Dai 1421

Performance Measure of Switched Control Systems Based on Covariance Tensor Approach

D.-Y. Jang and L.-S. Hu 1430

Robust Control under Constraints of Linear Systems with Markovian Jumps

M. Benbrahim, M. N. Kabbaj, and K. Benjelloun 1447

Iterative Learning Control for a Class of Mixed Hyperbolic-parabolic Distributed Parameter Systems

Q. Fu, W.-G. Gu, P.-P. Gu, and J.-R. Wu 1455

Robust Sliding Mode- H^∞ Control Approach for a Class of Nonlinear Systems Affected by Unmatched Uncertainties using a Poly-quadratic Lyapunov Function

W. Saad, A. Sellami, and G. Garcia 1464

Robust Backstepping Control for a Class of Nonlinear Systems using Generalized Disturbance Observer

J. Wang, S. He, and D. Lin 1475

Adaptive Synchronization of Leader-Follower Networked Systems against Communication Attenuation and Actuators Faults

L. Dong, J.-H. Wang, S.-S. Gu, Y.-B. Shi, and F.-M. Zhao 1484

Modified Stochastic Gradient Parameter Estimation Algorithms for a Nonlinear Two-variable Difference System

J. Chen and B. Jiang 1493

Synchronous Position Control Strategy for Bi-cylinder Electro-pneumatic Systems

H. Zhao and P. Ben-Tzvi 1501

Attitude Determination Algorithm using State Estimation Including Lever Arms between Center of Gravity and IMU

T. H. Fang, S. H. Park, K. Seo, and S. G. Park 1511

Experimental Comparison of New Adaptive PI Controllers Based on the Ultra-Local Model Parameter Identification

H. Thabet, M. Ayadi, and F. Rotella 1520

Robot and Applications

A New Instantaneous Center Analysis Methodology for Planar Closed Chains via Graphical Representation

M. Kim, M. S. Han, T. W. Seo, and J. W. Lee 1528

A Monocular Structured Light Vision Method for Pose Determination of Large Non-cooperative Satellites

X.-H. Gao, B. Liang, L. Pan, Z.-H. Li, and Y.-C. Zhang 1535

Path Tracking Controller Design of Four Wheel Independent Steering Automatic Guided Vehicle

Y. D. Setiawan, T. H. Nguyen, P. S. Pratama, H. K. Kim, and S. B. Kim 1550

Projected Predictive Energy-Bounding Approach for Multiple Degree-of-Freedom Haptic Teleoperation

R. Uddin, S. Park, S. Park, and J. Ryu 1561

Positioning and Obstacle Avoidance of Automatic Guided Vehicle in Partially Known Environment

P. S. Pratama, T. H. Nguyen, H. K. Kim, D. H. Kim, and S. B. Kim 1572

Heuristic Feature Extraction Method for BCI with Harmony Search and Discrete Wavelet Transform

S.-M. Park, T.-J. Lee, and K.-B. Sim 1582

Intelligent Control and Applications

Less Conservative Robust Stabilization Conditions for the Uncertain Polynomial Fuzzy System under Perfect and Imperfect Premise Matching

H. S. Kim, J. B. Park, and Y. H. Joo 1588

Linear Pole-placement Anti-windup Control for Input Saturation Nonlinear System Based on Takagi Sugeno Fuzzy Model

F.-G. Wang, H.-M. Wang, S.-K. Park, and X.-S. Wang 1599

Robust RST Control Design based on Multi-Objective Particle Swarm Optimization Approach

R. Madiouni, S. Bouallège, J. Haggège, and P. Siarry 1607

Effective Pedestrian Detection using Deformable Part Model based on Human Model

H. J. Choi, Y. S. Lee, D.-S. Shim, C. G. Lee, and K. N. Choi 1618

TECHNICAL NOTES AND CORRESPONDENCE

A Simple Smoother for Attitude and Position Estimation using Inertial Sensor

H. T. Duong and Y. S. Suh 1626

International Journal of Control, Automation, and Systems

CONTACT OFFICE : Institute of Control, Robotics and Systems, Bucheon Techno Park 401-I301-I, Pyeongcheon-ro 655, Wonmi-gu, Bucheon, Gyeonggi-do 14502, Korea. Tel: +82-32-234-5806, Fax: +82-32-234-5807, E-mail: journal@ijcas.com

Published by Institute of Control, Robotics and Systems and the Korean Institute of Electrical Engineers. Distributed by Springer. Printed by Dream Media. This journal is published bimonthly; on the first day of February, April, June, August, October, and December. This journal was supported by the Korean Federation of Science and Technology Societies (KOFST) Grant funded by the Korean Government. Subscription information is available at <http://www.ijcas.com> where full-text is available. It is printed on acid-free paper.

Information for Authors

International Journal of Control, Automation, and Systems

Aims and Scope

The International Journal of Control, Automation, and Systems (IJCAS) is a bimonthly published periodical. As of 2003, it is a joint publication of Institute of Control, Robotics and Systems (ICROS) and the Korean Institute of Electrical Engineers (KIEE). The purpose of the journal is to establish a high quality archival periodical presenting state of the art, recent advances and practical applications of control, automation and systems engineering. In the journal, the three technical areas included are: Control Theory and Applications, Robot and Applications, Intelligent Control and Applications.

Two types of contributions are regularly considered:

- (1) Regular Papers: Presentation of significant research, development or application of control concepts and normally limited to ten pages in final form.
- (2) Technical Notes and Correspondence: Brief technical notes, comments on published areas or established control topics, corrections to papers, and notes published in the Journal. Manuscripts up to five pages are allowed in final form.

Conditions of Publication

Submission of a manuscript implies that it has not been copyrighted, published, submitted, nor accepted for publication elsewhere. All submitted manuscripts should be as concise as possible. Longer manuscripts may be considered, but have a proportionately lower probability of acceptance.

Peer-Review

All manuscripts are treated as confidential and peer-reviewed by anonymous reviewers selected by Editorial Board. The corresponding author is notified possible of the editor's decision to accept, reject, or request revision of manuscripts. When the final revised manuscript is completely acceptable according to IJCAS format and criteria, it is scheduled for publication in the next available issue.

Submission by Internet

Manuscripts can be submitted electronically via our website. This can be done by visiting the IJCAS website at <http://ijcas.com> and following the instructions. Only PDF file is accepted and authors should embed all the fonts needed to print the paper.

Manuscript Preparation

- (1) Manuscripts must be written in English and the TeX source-file should be prepared in a LaTeX format (by using IJCAS.cls). Other file formats are accepted also as long as the manuscript is typeset in two-column and single-space structure; however the conversion process by the IJCAS may result in 1 to 3 month delay in the printing process.
- (2) Authors of an accepted manuscript will be required to provide the text of the final version of their manuscript on the website <http://ijcas.com>.
- (3) The preferred formats for graphics are TIF, EPS, and JPG formats. High-contrast line figures should be prepared with 600 dpi resolution, and color/gray

figures should be prepared with more than 300 dpi resolution. The color figures should be clearly seen even though they are printed back and white printers.

(4) Brief biographies and either clear glossy photographs of the authors or TIF, EPS, and JPG files of the figures should be added in the last page.

Manuscript Style

(1) First page must contain:

- a) Title of paper, author(s), and affiliation(s);
- b) Abstract (not exceeding 300 words for Regular Papers or 75 words for Technical Notes and Correspondence, and without equations, references, or footnotes);
- c) Keywords (at least four key words or phrases);
- d) Complete mailing address and e-mail address;
- e) Preferred address for correspondence and return of proofs; and,
- f) Footnotes (if desired) containing acknowledgement of financial or other support.

(2) Provide an introduction that includes a statement of the purpose and contribution of the paper.

(3) References should be cited within the text in numerical order according to their order of appearance. The numbered reference citation should be enclosed in brackets, e.g., "KF is proven in [1]. Dorf [2] introduced another method."

(4) References should appear at the end of the paper.

Example:

- [1] G. D. Hong, "Call for papers," IEEE Trans. on Automatic Control, AC-7, no. 1, pp. 100-105, January 1999.
- [2] C. H. Dorf, *Modern Control Systems*, Addison-Wesley, 1999.
- [3] G. D. Hong, "A way to success," Proc. of American Control Conference, San Diego, pp. 106-110, June 1999.

Copyright

It is the policy of the IJCAS to own the copyright to the technical contributions that it publishes on behalf of the interests of the IJCAS, its authors, and their employers, and to facilitate the appropriate reuse of this material to others.

Page Charge and Reprints

Authors should be charged for publication to make a contribution to defray part of the publication cost. A page charge form (USD 300 under 8 pages) is sent to the authors with proofs. Author will receive 20 reprints only if the reprint charge (USD 100) is honored.

Overlength Page Charge

An overlength page charge is imposed on all papers exceeding 8 pages in length, including illustrations. The charge is USD 100 per page for each page over the first eight.
