

REGULAR PAPERS

Control Theory and Applications

A Game-theoretical Approach for a Finite-time Consensus of Second-order Multi-agent System

L. Xue, C. Sun, and D. C. Wunsch II 1071

Guaranteed-performance Consensualization for High-order Multi-agent Systems with Intermittent Communications

L. Wang, Q. Chen, J. Xi, and G. Liu 1084

Group-consensus with Reference States for Heterogeneous Multi-agent Systems via Pinning Control

J. Huang, G. Wen, Z. Peng, X. Chu, and Y. Dong 1096

New Event-based Control for Sampled-data Consensus of Multi-agent Systems

L. Jian, J. Hu, J. Wang, and K. Shi 1107

Distributed Fixed-time Attitude Synchronization Control for Multiple Rigid Spacecraft

W.-S. Sui, G.-R. Duan, M.-Z. Hou, and M.-R. Zhang 1117

Event-triggered Non-fragile State Estimation for Discrete Nonlinear Markov Jump Neural Networks with Sensor Failures

J. Li, Z. Li, Y. Xu, K. Gu, W. Bao, and X. Xu 1131

Improved Results on Reachable Set Estimation of Linear Systems

J. Zhao and Z. Hu 1141

Robust UKF-IMM Filter for Tracking an Off-road Ground Target

J. W. Choi and K. Samuel 1149

Adaptive Fuzzy Control for Teleoperation System with Uncertain Kinematics and Dynamics

L. Yang, Y. Chen, Z. Liu, K. Chen, and Z. Zhang 1158

An Improved Consistent Subspace Identification Method Using Parity Space for State-space Models

J. Hou, F. Chen, P. Li, Z. Zhu, and F. Liu 1167

Distributed Convex Optimization for Flocking of Nonlinear Multi-agent Systems

Q. Zhang, Z. Gong, Z. Yang, and Z. Chen 1177

Fractional-disturbance-observer-based Sliding Mode Control for Fractional Order System with Matched and Mismatched Disturbances

S.-L. Shi, J.-X. Li, and Y.-M. Fang 1184

Anti-periodic Synchronization of Quaternion-valued Generalized Cellular Neural Networks with Time-varying Delays and Impulsive Effects

Y. Li, Y. Fang, and J. Qin 1191

Adaptive Synchronization for a Class of Fractional Order Time-delay Uncertain Chaotic Systems via Fuzzy Fractional Order Neural Network

X. Zhang, X. Zhang, D. Li, and D. Yang 1209

Optimal Discrete-time Integral Sliding Mode Control for Piecewise Affine Systems

O. Jedda and A. Douik 1221

Distributed Model Predictive Control of Iron Precipitation Process by Goethite Based on Dual Iterative Method

N. Chen, J. Dai, X. Zhou, Q. Yang, and W. Gui 1233

A Review of Industrial MIMO Decoupling Control

L. Liu, S. Tian, D. Xue, T. Zhang, Y. Chen, and S. Zhang 1246

Double-layer Dynamic Decoupling Control System for the Yaw Stability of Four Wheel Steering Vehicle

K. Shi, X. Yuan, and Q. He 1255

Global Practical Tracking for a Class of Switched Nonlinear Systems with Quantized Input and Output via Sampled-data Control

Y. Jiang and J. Zhai 1264

Robot and Applications

A Virtual Spring Method for the Multi-robot Path Planning and Formation Control

Z. Pan, D. Wang, H. Deng, and K. Li 1272

Decentralized Three Dimensional Formation Building Algorithms for a Team of Nonholonomic Mobile Agents

V. Nazarzehi and A. V. Savkin 1283

Dynamics and Optimized Torque Distribution Based Force/position Hybrid Control of a 4-DOF Redundantly Actuated Parallel Robot with Two Point-contact Constraints

H. Wen, M. Cong, G. Wang, W. Qin, W. Xu, and Z. Zhang 1293

Robotic Path Planning Based on Episodic-cognitive Map

Q. Zou, M. Cong, D. Liu, and Y. Du 1304

Intelligent Control and Applications

Lyapunov and Sliding Mode Based Leader-follower Formation Control for Multiple Mobile Robots with an Augmented Distance-angle Strategy

Y. Zhao, Y. Zhang, and J. Lee 1314

A New Stability Condition for Uncertain Fuzzy Hopfield Neural Networks with Time-varying Delays

J. Wang, X. Liu, J. Bai, and Y. Chen 1322

INDEXED IN Science Citation Index Expanded (SciSearch), SCOPUS, INSPEC, Google Scholar, ProQuest, Current Contents/Engineering, Computing and Technology, EI-Compendex, Journal Citation Reports/Science Edition, OCLC, Summon by Serial Solutions, Korea Citation Index.

CONTACT OFFICE : Institute of Control, Robotics and Systems, Suseo Hyundai-Ventureville 723, Bamgogae-ro 1-gil 10, Gangnam-gu, Seoul 06349, Korea. Tel: +82-2-6949-5806 Fax: +82-2-6949-5807, E-mail: journal@ijcas.com

Published by Institute of Control, Robotics and Systems and the Korean Institute of Electrical Engineers. Distributed by Springer. Printed by Dream Media. This journal is published monthly; on the first day of each month. This journal was supported by the Korean Federation of Science and Technology Societies Grant funded by the Korean Government (Ministry of Education). Subscription information is available at <http://www.ijcas.com> where full-text is available. It is printed on acid-free paper. Publisher's Note Springer Nature remains neutral with regard to jurisdictional claims in published maps and institutional affiliations.

Information for Authors

International Journal of Control, Automation, and Systems

Aims and Scope

The International Journal of Control, Automation, and Systems (IJCAS) is a monthly published periodical. As of 2003, it is a joint publication of Institute of Control, Robotics and Systems (ICROS) and the Korean Institute of Electrical Engineers (KIEE). The purpose of the journal is to establish a high quality archival periodical presenting state of the art, recent advances and practical applications of control, automation and systems engineering. In the journal, the three technical areas included are: Control Theory and Applications, Robot and Applications, Intelligent Control and Applications.

Two types of contributions are regularly considered:

- (1) *Regular Papers*: Presentation of significant research, development or application of control concepts and normally limited to ten pages in final form.
- (2) *Technical Notes and Correspondence*: Brief technical notes, comments on published areas or established control topics, corrections to papers, and notes published in the Journal. Manuscripts up to five pages are allowed in final form.

Conditions of Publication

Submission of a manuscript implies that it has not been copyrighted, published, submitted, nor accepted for publication elsewhere. All submitted manuscripts should be as concise as possible. Longer manuscripts may be considered, but have a proportionately lower probability of acceptance.

Peer-Review

All manuscripts are treated as confidential and peer-reviewed by anonymous reviewers selected by Editorial Board. The corresponding author is notified possible of the editor's decision to accept, reject, or request revision of manuscripts. When the final revised manuscript is completely acceptable according to IJCAS format and criteria, it is scheduled for publication in the next available issue.

Submission by Internet

Manuscripts can be submitted electronically via our website. This can be done by visiting the IJCAS website at <http://ijcas.com> and following the instructions. Only PDF file is accepted and authors should embed all the fonts needed to print the paper.

Manuscript Preparation

- (1) Manuscripts must be written in English and the TeX source-file should be prepared in a LaTeX format (by using IJCAS.cls). Other file formats are accepted also as long as the manuscript is typeset in two-column and single-space structure; however the conversion process by the IJCAS may result in 1 to 3 month delay in the printing process.
- (2) Authors of an accepted manuscript will be required to provide the text of the final version of their manuscript on the website <http://ijcas.com>.

(3) The preferred formats for graphics are TIF, EPS, and JPG formats. High-contrast line figures should be prepared with 600 dpi resolution, and color/gray figures should be prepared with more than 300 dpi resolution. The color figures should be clearly seen even though they are printed back and white printers.

(4) Brief biographies and either clear glossy photographs of the authors or TIF, EPS, and JPG files of the figures should be added in the last page.

Manuscript Style

- (1) First page must contain:
 - a) Title of paper, author(s), and affiliation(s);
 - b) Abstract (not exceeding 300 words for Regular Papers or 75 words for Technical Notes and Correspondence, and without equations, references, or footnotes);
 - c) Keywords (at least four key words or phrases);
 - d) Complete mailing address and e-mail address;
 - e) Preferred address for correspondence and return of proofs; and,
 - f) Footnotes (if desired) containing acknowledgement of financial or other support.
- (2) Provide an introduction that includes a statement of the purpose and contribution of the paper.
- (3) References should be cited within the text in numerical order according to their order of appearance. The numbered reference citation should be enclosed in brackets, e.g., "KF is proven in [1]. Dorf [2] introduced another method."
- (4) References should appear at the end of the paper. Example: [1] G. D. Hong, "Call for papers," *IEEE Trans. on Automatic Control*, AC-7, no. 1, pp. 100-105, January 1999. [2] C. H. Dorf, *Modern Control Systems*, Addison-Wesley, 1999. [3] G. D. Hong, "A way to success," *Proc. of American Control Conference*, San Diego, pp. 106-110, June 1999.

Copyright

It is the policy of the IJCAS to own the copyright to the technical contributions that it publishes on behalf of the interests of the IJCAS, its authors, and their employers, and to facilitate the appropriate reuse of this material to others.

Page Charge and Reprints

Authors should be charged for publication to make a contribution to defray part of the publication cost. A page charge form (USD 300 under 8 pages) is sent to the authors with proofs. Author will receive 1 hard copy of journal only if the reprint charge (USD 100) is honored.

Overlength Page Charge

An overlength page charge is imposed on all papers exceeding 8 pages in length, including illustrations. The charge is USD 100 per page for each page over the first eight.
