

REGULAR PAPERS

Control Theory and Applications

Fixed-time Trajectory Tracking Control of a Full State Constrained Marine Surface Vehicle with Model Uncertainties and External Disturbances

M. Fu, T. Wang, and C. Wang 1331

Extended PI Feedback Tracking Control for Synchronous Motors

F. Beltran-Carbajal, R. Tapia-Olvera, I. Lopez-Garcia, A. Valderrabano-Gonzalez, J. C. Rosas-Caro, and J. L. Hernandez-Avila 1346

A Multi-loop Switching Controller for Aircraft Gas Turbine Engine with Stability Proof

A. Imani and M. Montazeri-Gh 1359

Three-dimensional Adaptive Sliding Mode Guidance Law for Missile with Autopilot Lag and Actuator Fault

G. Li, Z. Yu, and Z. Wang 1369

Metaheuristics-based Multi-objective Design of Global Robust Optimal Sliding Mode Control of Discrete Uncertain Systems

W. Boukadida, A. Benamor, H. Messaoud, and P. Siarry 1378

Design and Stability Analysis of a Discrete-time Sliding Mode Control for a Synchronous DC-DC Buck Converter

M. J. Deylmani, P. Aniri, and M. H. Refan 1393

Adaptive Backstepping Based Fault-tolerant Control for High-speed Trains with Actuator Faults

S. Liu, B. Jiang, Z. Mao, and S. X. Ding 1408

Adaptive Fault-tolerant Neural Control for Large-scale Systems with Actuator Faults

J.-Y. Gong, B. Jiang, and Q.-K. Shen 1421

Robust Adaptive Dynamic Surface Control of Nonlinear Time-varying Systems in Strict-feedback Form

M. Elmi, H. A. Talebi, and M. B. Menhaj 1432

Adaptive Controller Design Based on Predicted Time-delay for Teleoperation Systems Using Lambert W Function

M. Sarajchi, S. Ganjefar, S. M. Hoseini, and Z. Shao 1445

Controller Design for MIMO System with Time Delay Using Closed-loop Gain Shaping Algorithm

Z. Zhang and X. Zhang 1454

Finite-time H_∞ Control of Stochastic Singular Systems with Partly Known Transition Rates via an Optimization Algorithm

Z. Wu, L. Yang, B. Jiang, and Y. Kao 1462

Asymptotic Stability of Master-slave Systems Using Sampled-data Controller with Time-delay

S. He, Y. Wu, and Y. Li 1473

Active Disturbance Rejection Control Applied to High-order Systems with Parametric Uncertainties

Z. Chu, C. Wu, and N. Sepehri 1483

Formation Control with Multiple Leaders via Event-triggering Transmission Strategy

J. Liu, J. Fang, Z. Li, and G. He 1494

Fuzzy Controller for Laboratory Levitation System: Real-time Experiments Using Programmable Logic Controller

K. Czerwiński, A. Wojtulewicz, and M. Ławryńczuk 1507

Quantitative-fuzzy Controller Design for Multivariable Systems with Uncertainty

M. R. Gharib and A. Daneshvar 1515

Experimental Verification of a Novel Quad-RLS Technique for Improving Real-time System Identification Performance : A Practical Approach to CMG

S.-D. Lee and S. Jung 1524

Visual Monitoring of Industrial Operation States Based on Kernel Fisher Vector and Self-organizing Map Networks

W.-P. Lu and X.-F. Yan 1535

Two-stage Recursive Least Squares Parameter Estimation Algorithm for Multivariate Output-error Autoregressive Moving Average Systems

Y. Guo, L. Wan, L. Xu, F. Ding, A. Alsaedi, and T. Hayat 1547

Black-box Modeling for Aircraft Maneuver Control with Bayesian Optimization

D. Kim, H.-S. Oh, and I.-C. Moon 1558

Robot and Applications

Two-DOF Anthropomorphic Test Devices Reproducing Human Rider Motion Intent for the Evaluation of Dynamic Stability and Safety of Unicycle Robots

S. Yun, K.-W. Gwak, S.-G. Lee, and C.-W. Kim 1569

An Enhanced Coupling PD with Sliding Mode Control Method for Underactuated Double-pendulum Overhead Crane Systems

M. Zhang, Y. Zhang, and X. Cheng 1579

Stability Analysis of a Visual PID Controller Applied to a Planar Parallel Robot

R. Garrido and M. A. Trujano 1589

Intelligent Control and Applications

Text Detection with Deep Neural Network System Based on Overlapped Labels and a Hierarchical Segmentation of Feature Maps

H.-H. Kim, J.-H. Jo, Z. Teng, and D.-J. Kang 1599

INDEXED IN Science Citation Index Expanded (SciSearch), SCOPUS, INSPEC, Google Scholar, ProQuest, Current Contents/Engineering, Computing and Technology, EI-Compendex, Journal Citation Reports/Science Edition, OCLC, Summon by Serial Solutions, Korea Citation Index.

CONTACT OFFICE : Institute of Control, Robotics and Systems, Suseo Hyundai-Ventureville 723, Bamgogae-ro 1-gil 10, Gangnam-gu, Seoul 06349, Korea. Tel: +82-2-6949-5806 Fax: +82-2-6949-5807, E-mail: journal@ijcas.com

Published by Institute of Control, Robotics and Systems and the Korean Institute of Electrical Engineers. Distributed by Springer. Printed by Dream Media. This journal is published monthly; on the first day of each month. This journal was supported by the Korean Federation of Science and Technology Societies Grant funded by the Korean Government (Ministry of Education). Subscription information is available at <http://www.ijcas.com> where full-text is available. It is printed on acid-free paper. Publisher's Note Springer Nature remains neutral with regard to jurisdictional claims in published maps and institutional affiliations.

Information for Authors

International Journal of Control, Automation, and Systems

Aims and Scope

The International Journal of Control, Automation, and Systems (IJCAS) is a monthly published periodical. As of 2003, it is a joint publication of Institute of Control, Robotics and Systems (ICROS) and the Korean Institute of Electrical Engineers (KIEE). The purpose of the journal is to establish a high quality archival periodical presenting state of the art, recent advances and practical applications of control, automation and systems engineering. In the journal, the three technical areas included are: Control Theory and Applications, Robot and Applications, Intelligent Control and Applications.

Two types of contributions are regularly considered:

- (1) *Regular Papers*: Presentation of significant research, development or application of control concepts and normally limited to ten pages in final form.
- (2) *Technical Notes and Correspondence*: Brief technical notes, comments on published areas or established control topics, corrections to papers, and notes published in the Journal. Manuscripts up to five pages are allowed in final form.

Conditions of Publication

Submission of a manuscript implies that it has not been copyrighted, published, submitted, nor accepted for publication elsewhere. All submitted manuscripts should be as concise as possible. Longer manuscripts may be considered, but have a proportionately lower probability of acceptance.

Peer-Review

All manuscripts are treated as confidential and peer-reviewed by anonymous reviewers selected by Editorial Board. The corresponding author is notified possible of the editor's decision to accept, reject, or request revision of manuscripts. When the final revised manuscript is completely acceptable according to IJCAS format and criteria, it is scheduled for publication in the next available issue.

Submission by Internet

Manuscripts can be submitted electronically via our website. This can be done by visiting the IJCAS website at <http://ijcas.com> and following the instructions. Only PDF file is accepted and authors should embed all the fonts needed to print the paper.

Manuscript Preparation

- (1) Manuscripts must be written in English and the TeX source-file should be prepared in a LaTeX format (by using IJCAS.cls). Other file formats are accepted also as long as the manuscript is typeset in two-column and single-space structure; however the conversion process by the IJCAS may result in 1 to 3 month delay in the printing process.
- (2) Authors of an accepted manuscript will be required to provide the text of the final version of their manuscript on the website <http://ijcas.com>.

(3) The preferred formats for graphics are TIF, EPS, and JPG formats. High-contrast line figures should be prepared with 600 dpi resolution, and color/gray figures should be prepared with more than 300 dpi resolution. The color figures should be clearly seen even though they are printed back and white printers.

(4) Brief biographies and either clear glossy photographs of the authors or TIF, EPS, and JPG files of the figures should be added in the last page.

Manuscript Style

(1) First page must contain:

- a) Title of paper, author(s), and affiliation(s);
- b) Abstract (not exceeding 300 words for Regular Papers or 75 words for Technical Notes and Correspondence, and without equations, references, or footnotes);
- c) Keywords (at least four key words or phrases);
- d) Complete mailing address and e-mail address;
- e) Preferred address for correspondence and return of proofs; and,
- f) Footnotes (if desired) containing acknowledgement of financial or other support.

(2) Provide an introduction that includes a statement of the purpose and contribution of the paper.

(3) References should be cited within the text in numerical order according to their order of appearance. The numbered reference citation should be enclosed in brackets, e.g., "KF is proven in [1]. Dorf [2] introduced another method."

(4) References should appear at the end of the paper. Example: [1] G. D. Hong, "Call for papers," *IEEE Trans. on Automatic Control*, AC-7, no. 1, pp. 100-105, January 1999.

[2] C. H. Dorf, *Modern Control Systems*, Addison-Wesley, 1999.

[3] G. D. Hong, "A way to success," *Proc. of American Control Conference*, San Diego, pp. 106-110, June 1999.

Copyright

It is the policy of the IJCAS to own the copyright to the technical contributions that it publishes on behalf of the interests of the IJCAS, its authors, and their employers, and to facilitate the appropriate reuse of this material to others.

Page Charge and Reprints

Authors should be charged for publication to make a contribution to defray part of the publication cost. A page charge form (USD 300 under 8 pages) is sent to the authors with proofs. Author will receive 1 hard copy of journal only if the reprint charge (USD 100) is honored.

Overlength Page Charge

An overlength page charge is imposed on all papers exceeding 8 pages in length, including illustrations. The charge is USD 100 per page for each page over the first eight.
