

REGULAR PAPERS

Control Theory and Applications

Controlled Synchronization of Nonlinear Teleoperation in Task-space with Time-varying Delays

A. Zakerimanesh, F. Hashemzadeh, A. Torabi, and M. Tavakoli 1875

Fast Terminal Sliding Control Application for Second-order Under-actuated Systems

A. M. Singh and Q. P. Ha 1884

Further Improvement on Delay-derivative-dependent Stochastic Stability Criteria for Markovian Jumping Neutral-type Interval Time-varying Delay Systems with Mixed Delays

P.-L. Liu 1899

Real-time Inverse Model Estimation by a Recursive Least Squares Method for Disturbance Observer-based Control Systems: Balancing Control of a Single-wheel Robot

S.-D. Lee and S. Jung 1911

Time-varying  $H_\infty$  Control for Discrete-time Switched Systems with Admissible Edge-dependent Average Dwell Time

R.-H. Wang, B.-X. Xue, and J.-B. Zhao 1921

Stability of Limiting Zeros of Sampled-data Systems with Backward Triangle Sample and Hold

M. Ou, S. Liang, and C. Zeng 1935

Distributed Event-triggered Consensus Control for Heterogeneous Multiagent Systems under Fixed and Switching Topologies

J. Huang, L. Chen, X. Xie, M. Wang, and B. Xu 1945

Passive Fault-tolerant Control Based on Weighted LPV Tube-MPC for Air-breathing Hypersonic Vehicles

C. Hu, X. Wei, and Y. Ren 1957

Lag Group Consensus for the Second-order Nonlinear Multi-agent Systems via Adaptive Control Approach

W. Guo, W. Luo, and Z. Zheng 1971

3D Trajectory Tracking Control for a Thrust-Propelled Vehicle with Time-varying Disturbances

M. Kabiri, H. Atrianfar, and M. B. Menhaj 1978

Integral Sliding Mode based Control for Quadrotors with Disturbances: Simulations and Experiments

T. Jiang, T. Song, and D. Lin 1987

Robust  $H_\infty$  Control for Switched Nonlinear Port-controlled Hamiltonian Systems

Z.-M. Wang, A. Wei, and X. Zhang 1999

Prediction-observer Scheme for Linear Systems with Input-output Timedelay

V. Fragoso-Rubio, M. Velasco-Villa, M. A. Hernández-Pérez, B. del Muro-Cuéllar, and J. F. Márquez-Rubio 2012

Finite-time Fault Detection Filtering for Switched Singular Systems with All Modes Unstable: an ADT Approach

Q. Su, Z. Fan, D. Zhang, and J. Li 2026

Decomposition-based Gradient Estimation Algorithms for Multi-variable Equation-error Systems

X. Lu, F. Ding, A. Alsaedi, and T. Hayat 2037

Event-triggered Bipartite Consensus for Multi-agent Systems with Antagonistic Interactions

J. Li, X. Chen, F. Hao, and J. Xie 2046

Reliable Robust Control for Semi-Markovian Jump Sampled-data Systems Based on a Dissipativity Unified Framework

Y. Zhang, Y. Ma, L. Fu, and W. Zhao 2059

Robot and Applications

A Novel Tip-positioning Control of a Magnetically Steerable Guidewire in Sharply Curved Blood Vessel for Percutaneous Coronary Intervention

J. Kim, P. B. Nguyen, B. Kang, E. Choi, J.-O. Park, and C.-S. Kim 2069

Parametric Sensitivity Analyses for Perceived Impedance in Haptic Teleoperation

R. Uddin, M. H. Saleem, and J. Ryu 2083

Probability Navigation Function for Stochastic Static Environments

S. Hacoheh, S. Shoval, and N. Shvalb 2097

Intelligent Control and Applications

Passivity Analysis for Uncertain BAM Neural Networks with Leakage, Discrete and Distributed Delays Using Novel Summation Inequality

S. Chandran, R. Ramachandran, J. Cao, R. P. Agarwal, and G. Rajchakit 2114

Fault Detection Method Using Multi-mode Principal Component Analysis Based on Gaussian Mixture Model for Sewage Source Heat Pump System

Y.-J. Yoo 2125

Iterative Learning Control for Leader-following Consensus of Non-linear Multi-agent Systems with Packet Dropout

X. Deng, X. Sun, and S. Liu 2135

Mean-square Stability in Lagrange Sense for Stochastic Memristive Neural Networks with Leakage Delay

L. Li, R. Xu, and J. Lin 2145

TECHNICAL NOTES AND CORRESPONDENCE

A Method for Quantitative Fault Diagnosability Analysis of Systems with Probabilistic Sensor Faults

F. Fu and D. Wang 2159

**INDEXED IN** Science Citation Index Expanded (SciSearch), SCOPUS, INSPEC, Google Scholar, ProQuest, Current Contents/Engineering, Computing and Technology, El-Compendex, Journal Citation Reports/Science Edition, OCLC, Summon by Serial Solutions, Korea Citation Index.

# Information for Authors

International Journal of Control, Automation, and Systems

#### Aims and Scope

The International Journal of Control, Automation, and Systems (IJCAS) is a monthly published periodical. As of 2003, it is a joint publication of Institute of Control, Robotics and Systems (ICROS) and the Korean Institute of Electrical Engineers (KIEE). The purpose of the journal is to establish a high quality archival periodical presenting state of the art, recent advances and practical applications of control, automation and systems engineering. In the journal, the three technical areas included are: Control Theory and Applications, Robot and Applications, Intelligent Control and Applications.

Two types of contributions are regularly considered:

- (1) *Regular Papers*: Presentation of significant research, development or application of control concepts and normally limited to ten pages in final form.
- (2) *Technical Notes and Correspondence*: Brief technical notes, comments on published areas or established control topics, corrections to papers, and notes published in the Journal. Manuscripts up to five pages are allowed in final form.

#### Conditions of Publication

Submission of a manuscript implies that it has not been copyrighted, published, submitted, nor accepted for publication elsewhere. All submitted manuscripts should be as concise as possible. Longer manuscripts may be considered, but have a proportionately lower probability of acceptance.

#### Peer-Review

All manuscripts are treated as confidential and peer-reviewed by anonymous reviewers selected by Editorial Board. The corresponding author is notified possible of the editor's decision to accept, reject, or request revision of manuscripts. When the final revised manuscript is completely acceptable according to IJCAS format and criteria, it is scheduled for publication in the next available issue.

#### Submission by Internet

Manuscripts can be submitted electronically via our website. This can be done by visiting the IJCAS website at <http://ijcas.com> and following the instructions. Only PDF file is accepted and authors should embed all the fonts needed to print the paper.

#### Manuscript Preparation

- (1) Manuscripts must be written in English and the TeX source-file should be prepared in a LaTeX format (by using IJCAS.cls). Other file formats are accepted also as long as the manuscript is typeset in two-column and single-space structure; however the conversion process by the IJCAS may result in 1 to 3 month delay in the printing process.
- (2) Authors of an accepted manuscript will be required to provide the text of the final version of their manuscript on the website <http://ijcas.com>.

(3) The preferred formats for graphics are TIF, EPS, and JPG formats. High-contrast line figures should be prepared with 600 dpi resolution, and color/gray figures should be prepared with more than 300 dpi resolution. The color figures should be clearly seen even though they are printed back and white printers.

(4) Brief biographies and either clear glossy photographs of the authors or TIF, EPS, and JPG files of the figures should be added in the last page.

#### Manuscript Style

- (1) First page must contain:
  - a) Title of paper, author(s), and affiliation(s);
  - b) Abstract (not exceeding 300 words for Regular Papers or 75 words for Technical Notes and Correspondence, and without equations, references, or footnotes);
  - c) Keywords (at least four key words or phrases);
  - d) Complete mailing address and e-mail address;
  - e) Preferred address for correspondence and return of proofs; and,
  - f) Footnotes (if desired) containing acknowledgement of financial or other support.
- (2) Provide an introduction that includes a statement of the purpose and contribution of the paper.
- (3) References should be cited within the text in numerical order according to their order of appearance. The numbered reference citation should be enclosed in brackets, e.g., "KF is proven in [1]. Dorf [2] introduced another method."
- (4) References should appear at the end of the paper. Example: [1] G. D. Hong, "Call for papers," *IEEE Trans. on Automatic Control*, AC-7, no. 1, pp. 100-105, January 1999.  
[2] C. H. Dorf, *Modern Control Systems*, Addison-Wesley, 1999.  
[3] G. D. Hong, "A way to success," *Proc. of American Control Conference*, San Diego, pp. 106-110, June 1999.

#### Copyright

It is the policy of the IJCAS to own the copyright to the technical contributions that it publishes on behalf of the interests of the IJCAS, its authors, and their employers, and to facilitate the appropriate reuse of this material to others.

#### Page Charge and Reprints

Authors should be charged for publication to make a contribution to defray part of the publication cost. A page charge form (USD 300 under 8 pages) is sent to the authors with proofs. Author will receive 1 hard copy of journal only if the reprint charge (USD 100) is honored.

#### Overlength Page Charge

An overlength page charge is imposed on all papers exceeding 8 pages in length, including illustrations. The charge is USD 100 per page for each page over the first eight.
