

REGULAR PAPERS

Deep RL Based Notch Filter Design Method for Complex Industrial Servo Systems

T.-H. Oh, J.-S. Han, Y.-S. Kim, D.-Y. Yang, S.-H. Lee, and D. Cho 2983

Fault-tolerant Control Based on Fixed-time Observer for a 3-DOF Helicopter System

X. Yang, Y. Wang, J. Yang, and T. Wang 2993

An Improved Sliding Mode Differentiator Combined with Sliding Mode Filter for Estimating First and Second-order Derivatives of Noisy Signals

G. Byun and R. Kikuuwe 3001

Trajectory Tracking Control for Nonholonomic Wheeled Mobile Robots with External Disturbances and Parameter Uncertainties

H. Ye and S. Wang 3015

Time Series Prediction of Wastewater Flow Rate by Bidirectional LSTM Deep Learning

H. Kang, S. Yang, J. Huang, and J. Oh 3023

Fault Detection for Interconnected Systems Subject to Packet Dropouts via Switching Scheme

J. Li, J. Wang, Q. Su, C.-Y. Wu, and X.-Q. Zhao 3031

On Optimal Buffer Allocation for Guaranteeing Quality of Service in Multimedia Internet Broadcasting for Mobile Networks

A. Caliciotti and L. R. Celsi 3043

Context Awareness and Step Length Estimation by Shape Distance and H-Features

D. Kim, Y. Lee, and C. G. Park 3051

Influence Analysis of Leader Information with Application to Formation Control of Multi-agent Systems

B. He and F. Gao 3062

Automatic Grader for Flatfishes Using Machine Vision

H.-J. Sung, M.-K. Park, and J. W. Choi 3073

PD Control of a Manipulator with Gravity and Inertia Compensation Using an RBF Neural Network

Y. Zhang, D. Kim, Y. Zhao, and J. Lee 3083

Balance Control for the First-order Inverted Pendulum Based on the Advantage Actor-critic Algorithm

Y. Zheng, X. Li, and L. Xu 3093

Neuro-based Canonical Transformation of Port Controlled Hamiltonian Systems

A. Qureshi, S. E. Ferik, and F. L. Lewis 3101

Design and Control of a Sphere Robot Using a Control Moment Gyroscope Actuator for Navigation

H. W. Kim and S. Jung 3112

Observer-based H_∞ Control for Synchronization in Delayed Neural Networks Under Multiple Disturbances

T. Wang, J. Ge, T. Li, X. Chen, and S. Fei 3121

Dynamic Output Feedback H_∞ Control for Linear Parameter-varying Systems with Time-delay

J. Huang, X. Pan, X. Hao, and W. Putra 3133

Radar Accuracy Modeling and Its Application to Object Vehicle Tracking

W. Y. Choi, C. M. Kang, S.-H. Lee, and C. C. Chung 3146

Robust Fault Diagnosis Observer Design for Uncertain Switched Systems

D. Du, Y. Yang, H. Zhao, and Y. Tan 3159

Separable Recursive Gradient Algorithm for Dynamical Systems Based on the Impulse Response Signals

L. Xu, F. Ding, and E. Yang 3167

Positioning and Trajectory Tracking for Caterpillar Vehicles in Unknown Environment

V. L. Nguyen, D. H. Kim, V. S. Le, S. K. Jeong, C. H. Lee, H. K. Kim, and S. B. Kim 3178

Stabilizing Control of an Unmanned Surface Vehicle Pushing a Floating Load

R. V. C. Rosario, J. P. V. S. Cunha, and P. B. Garcia-Rosa 3194

Task Assignment for Deploying Unmanned Aircraft as Decoys

Dileep M V, B. Yu, S. Kim, and H. Oh 3204

Feedforward and Feedback Compound Control of Vibration Displacement for a Continuous Casting Mold Driven by a Servo Motor

Q. Li, Y. Fang, J. Li, and W. Zhang 3218

Analysis of Front and Rear Asymmetric Wheelset Applying Switch Control of Individual Motor and Active Coupler to Improve Running Performance of Independently Rotating Wheel Type Railway Vehicle

Y. Cho 3229

TECHNICAL NOTES AND CORRESPONDENCE

Design of Repetitive Control Systems Using a Delayed Control Input and a State Error

T.-Y. Doh and J. R. Ryoo 3242

Information for Authors

International Journal of Control, Automation, and Systems

Aims and Scope

The International Journal of Control, Automation, and Systems (IJCAS) is a monthly published periodical. As of 2003, it is a joint publication of Institute of Control, Robotics and Systems (ICROS) and the Korean Institute of Electrical Engineers (KIEE). The purpose of the journal is to establish a high quality archival periodical presenting state of the art, recent advances and practical applications of control, automation and systems engineering. In the journal, the three technical areas included are: Control Theory and Applications, Robot and Applications, Intelligent Control and Applications.

Two types of contributions are regularly considered:

(1) *Regular Papers*: Presentation of significant research, development or application of control concepts and normally limited to ten pages in final form.

(2) *Technical Notes and Correspondence*: Brief technical notes, comments on published areas or established control topics, corrections to papers, and notes published in the Journal. Manuscripts up to five pages are allowed in final form.

Conditions of Publication

Submission of a manuscript implies that it has not been copyrighted, published, submitted, nor accepted for publication elsewhere. All submitted manuscripts should be as concise as possible. Longer manuscripts may be considered, but have a proportionately lower probability of acceptance.

Peer-Review

All manuscripts are treated as confidential and peer-reviewed by anonymous reviewers selected by Editorial Board. The corresponding author is notified possible of the editor's decision to accept, reject, or request revision of manuscripts. When the final revised manuscript is completely acceptable according to IJCAS format and criteria, it is scheduled for publication in the next available issue.

Submission by Internet

Manuscripts can be submitted electronically via our website. This can be done by visiting the IJCAS website at <http://ijcas.com> and following the instructions. Only PDF file is accepted and authors should embed all the fonts needed to print the paper.

Manuscript Preparation

(1) Manuscripts must be written in English and the TeX source-file should be prepared in a LaTeX format (by using IJCAS.cls). Other file formats are accepted also as long as the manuscript is typeset in two-column and single-space structure; however the conversion process by the IJCAS may result in 1 to 3 month delay in the printing process.

(2) Authors of an accepted manuscript will be required to provide the text of the final version of their manuscript on the website <http://ijcas.com>.

(3) The preferred formats for graphics are TIF, EPS, and JPG formats. High-contrast line figures should be prepared with 600 dpi resolution, and color/gray figures should be prepared with more than 300 dpi resolution. The color figures should be clearly seen even though they are printed back and white printers.

(4) Brief biographies and either clear glossy photographs of the authors or TIF, EPS, and JPG files of the figures should be added in the last page.

Manuscript Style

(1) First page must contain:

- Title of paper, author(s), and affiliation(s);
- Abstract (not exceeding 300 words for Regular Papers or 75 words for Technical Notes and Correspondence, and without equations, references, or footnotes);
- Keywords (at least four key words or phrases);
- Complete mailing address and e-mail address;
- Preferred address for correspondence and return of proofs; and,
- Footnotes (if desired) containing acknowledgement of financial or other support.

(2) Provide an introduction that includes a statement of the purpose and contribution of the paper.

(3) References should be cited within the text in numerical order according to their order of appearance. The numbered reference citation should be enclosed in brackets, e.g., "KF is proven in [1]. Dorf [2] introduced another method."

(4) References should appear at the end of the paper. Example: [1] G. D. Hong, "Call for papers," *IEEE Trans. on Automatic Control*, AC-7, no. 1, pp. 100-105, January 1999.

[2] C. H. Dorf, *Modern Control Systems*, Addison-Wesley, 1999.

[3] G. D. Hong, "A way to success," *Proc. of American Control Conference*, San Diego, pp. 106-110, June 1999.

Copyright

It is the policy of the IJCAS to own the copyright to the technical contributions that it publishes on behalf of the interests of the IJCAS, its authors, and their employers, and to facilitate the appropriate reuse of this material to others.

Page Charge and Reprints

Authors should be charged for publication to make a contribution to defray part of the publication cost. A page charge form (USD 300 under 8 pages) is sent to the authors with proofs. Author will receive 1 hard copy of journal only if the reprint charge (USD 100) is honored.

Overlength Page Charge

An overlength page charge is imposed on all papers exceeding 8 pages in length, including illustrations. The charge is USD 100 per page for each page over the first eight.
