

REGULAR PAPERS

Control Theory

**$H_\infty$  Filtering for Discrete-Time Systems with Time-Varying Delay**

W. Wang, H. Zhang, and C. Han 1159

**Sliding Mode Control of Uncertain Switched Delay Systems via Hysteresis Switching Strategy**

J. Lian and J. Zhao 1171

**Optimal and Suboptimal Minimum-Variance Filtering in Networked Systems with Mixed Uncertainties of Random Sensor Delays, Packet Dropouts and Missing Measurements**

M. Moayedi, Y. K. Foo, and Y. C. Soh 1179

**A New TSMC Prototype Robust Nonlinear Task Space Control of a 6 DOF Parallel Robotic Manipulator**

D. Zhao, S. Li, and Q. Zhu 1189

**Parameter Convergence in Adaptive Feedback Linearizing Control of Limit Cycling Systems with Input Saturation**

N. Ananthkrishnan, R. Bansal, H. Jain, and N. Gupta 1198

**Adaptive Robust Control of Uncertain Systems with State and Input Delay**

M. H. Toodeshki, S. Hosseinnia, and J. Askari 1212

Control Applications

**Motion Control of an Omnidirectional Mobile Platform for Trajectory Tracking Using an Integral Sliding Mode Controller**

N. Hung, T. D. Viet, J. S. Im, H. K. Kim, and S. B. Kim 1221

**INS/vSLAM System Using Distributed Particle Filter**

D. H. Won, S. Chun, S. Sung, Y. J. Lee, J. Cho, J. Joo, and J. Park 1232

**Dynamic Simulation of Vapor-Compression Cycle Using Neural Networks**

Y.-J. Yoon and M. H. Lee 1241

**Effect of Sample-and-hold on a Haptic Interface with the Multirate Wave Transform**

C. Cho 1250

Robotics and Automation

**Trajectory Linearization Based Output Tracking Control of an Unmanned Tandem Helicopter with Variance Constraints**

S.-Q. Liu, J.-G. Lu, and Z.-L. Jing 1257

**Dynamics and Stabilization of a Spherical Inverted Pendulum on a Wheeled Cart**

M.-G. Yoon 1271

**Optimally Overlapped Ultrasonic Sensor Ring Design for Minimal Positional Uncertainty in Obstacle Detection**

S. Kim and H. Kim 1280

**A Generalized Framework of Dynamic Role Assignment for Robot Formation Control**

Y.-C. Chen and Y.-T. Wang 1288

Intelligent and Information Systems

**A RBF Neural Network Sliding Mode Controller for SMA Actuator**

N. T. Tai and K. K. Ahn 1296

**Evolutionary Algorithm based Optimization for Power Quality Disturbances Classification Using Support Vector Machines**

M. N. Mohanty, A. Kumar, A. Routray, and P. Kabisatpathy 1306

**Flood Fill Mean Shift: A Robust Segmentation Algorithm**

J. Lee and H. Kang 1313

**Control of Chaos in SEPIC DC-DC Converter**

A. Kavitha and G. Uma 1320

TECHNICAL NOTES AND CORRESPONDENCE

**Near-Optimal Tracking Control for Discrete-time Systems with Delayed Input**

S.-Y. Han, G.-Y. Tang, and C.-M. Zhang 1330

**Robust Finite-Time  $H_\infty$  Control of Stochastic Jump Systems**

S.-P. He and F. Liu 1336

**Feedback Control with Scheduled Communication Sequences and Random Delays**

G. Guo 1342

**A Multi-Robot Positioning System using a Multi-Code Ultrasonic Sensor Network and a Kalman Filter**

W. Moon, B. S. Cho, J. W. Jang, and K. R. Baek 1349

**Reduced-order Consensus Controllers for Output-coupled SISO Linear Systems**

J. H. Seo, H. Shim, and J. Back 1356

**A Novel Maximum Power Point Tracking Algorithms for Stand-alone Photovoltaic System**

S. Zhou, L. Kang, J. Sun, G. Guo, B. Cheng, B. Cao, Y. Tang 1364

**INDEXED IN** Science Citation Index Expanded (SCIE), CompuMath Citation Index®, Current Contents®/Engineering Computing & Technology, Compendex (Engineering Index), SCOPUS, Korea Research Foundation Index.

International Journal of  
**Control, Automation,  
and Systems**
