

REGULAR PAPERS

Invited Paper

Model Predictive Control: Review of the Three Decades of Development

J. H. Lee 415

Control Theory

Design of Stabilizing Control for Synchronous Machines via Polynomial Modelling and Linear Matrix Inequalities Approach

M. M. Belhaouane and N. B. Braiek 425

Delay-Dependent H_∞ Control for Jumping Delayed Systems with Two Markov Processes

H. Shen, Y. Chu, S. Xu, and Z. Zhang 437

Fault Estimation and Accommodation for Switched Systems with Time-varying Delay

D. Du, B. Jiang, and P. Shi 442

A GGP Approach to Solve Non Convex Min-max Predictive Controller for a Class of Constrained MIMO Systems Described by State-space Models

A. Kheriji, F. Bouani, and M. Ksouri 452

Design of Uncertain Multi-input Systems with State Delay and Input Deadzone Nonlinearity via Sliding Mode Control

W.-J. Liu, K.-K. Shyu, and K.-C. Hsu 461

Time Forward Observer Based Adaptive Controller for a Teleoperation System

V. T. Minh and F. B. M. Hashim 470

Control Applications

Study of Delay-Independent Decentralized Guaranteed Cost Control for Large Scale Systems

C.-X. Dou, Z.-S. Duan, X.-B. Jia, and P.-F. Niu 478

Utilizing Higher-Order Neural Networks in U-model Based Controllers for Stable Nonlinear Plants

M. Shafiq and N. R. Butt 489

Improved Calibration Method for SDINS Considering Body-Frame Drift

K.-J. Han, C.-K. Sung, and M.-J. Yu 497

Improvement of Tracking Performance Using Prediction-Based Algorithms for a Maneuvering Target

H. P. Gao, C. H. Yu, J. W. Choi, and T. I. Seo 506

Robotics and Automation

An Adaptive Foot Device for Increased Gait and Postural Stability in Lower Limb Orthoses and Exoskeletons

J. Yoon, R. P. Kumar, and A. Özer 515

Intelligent and Information Systems

Robust H_∞ DOF Control for Uncertain T-S Fuzzy Neutral Systems

W. Luo, J. Yang, L. Xiang, and S. Zhong 525

Adaptive Observer-based Trajectory Tracking Control of Non-holonomic Mobile Robots

B. S. Park, J. B. Park, and Y. H. Choi 534

New MCT-based Face Recognition under Varying Lighting Conditions

S.-K. Park and D.-G. Sim 542

TECHNICAL NOTES AND CORRESPONDENCE

Passive Fuzzy Controller Design via Observer Feedback for Stochastic Takagi-Sugeno Fuzzy Models with Multiplicative Noises

W.-J. Chang, L.-Z. Liu, and C.-C. Ku 550

Full Order H_∞ Filtering for Linear Systems in the Frequency Domain

M. Ezzine, H. S. Ali, M. Darouach, and H. Messaoud 558

Nonlinear State Feedback Design for Continuous Polynomial Systems

W. J. Jemai, H. Jerbi, and M. N. Abdelkrim 566

Position Determination Using the DTV Segment Sync Signal

G. B. Moon, G.-I. Jee, and J. G. Lee 574

Stabilization of Saturated Discrete-Time Fuzzy Systems

A. Benzaouia, S. Gounane, F. Tadeo, and A. E. Hajjaji 581

On-line Identification Algorithm and Convergence Analysis for Sandwich Systems with Backlash

R. Dong and Y. Tan 588

Superiority Demonstration of Variance-Considered Machines by Comparing Error Rate with Support Vector Machines

H.-G. Yeom, S.-M. Park, J. Park, and K.-B. Sim 595

A Novel H_∞ UIO Design for Actuator FDI in Finite Frequency Domain

K. Y. Lum, J. Xu, L. Xie, and A. P. Loh 601

Design of Generalized Terminal Sliding Mode Control for Second-Order Systems

Y.-H. Jo, Y.-H. Lee, and K.-B. Park 606

Delay-dependent Robust l_2 - l_∞ Filter Design for Uncertain Delta-Operator Time Delay Systems

X. Xiao and L. Zhou 611

INDEXED IN Science Citation Index Expanded (SCIE), CompuMath Citation Index®, Current Contents®/Engineering Computing & Technology, Compendex (Engineering Index), SCOPUS, Korea Citation Index.

IJCAAS

International Journal of
**Control, Automation,
and Systems**
